What was the Cold War? (Why is it referred to as “cold”?)

The conflict following the end of World War II between the U.S.A., the United Kingdom, and the Soviet Union was based upon the disagreement on the subject of the management and plans for restoration of the occupied regions in Europe and Asia. The capitalist countries such as the U.S.A. (the West) and the socialist countries (the East) disagreed with each other, leading to the break out of civil wars in the world.

Several events such as the unification of West-East Germany and the dissolution of the Soviet Union, all of which occurred between 1985 and 1989, weakened the power of the East side and consequently ended the Cold War.
